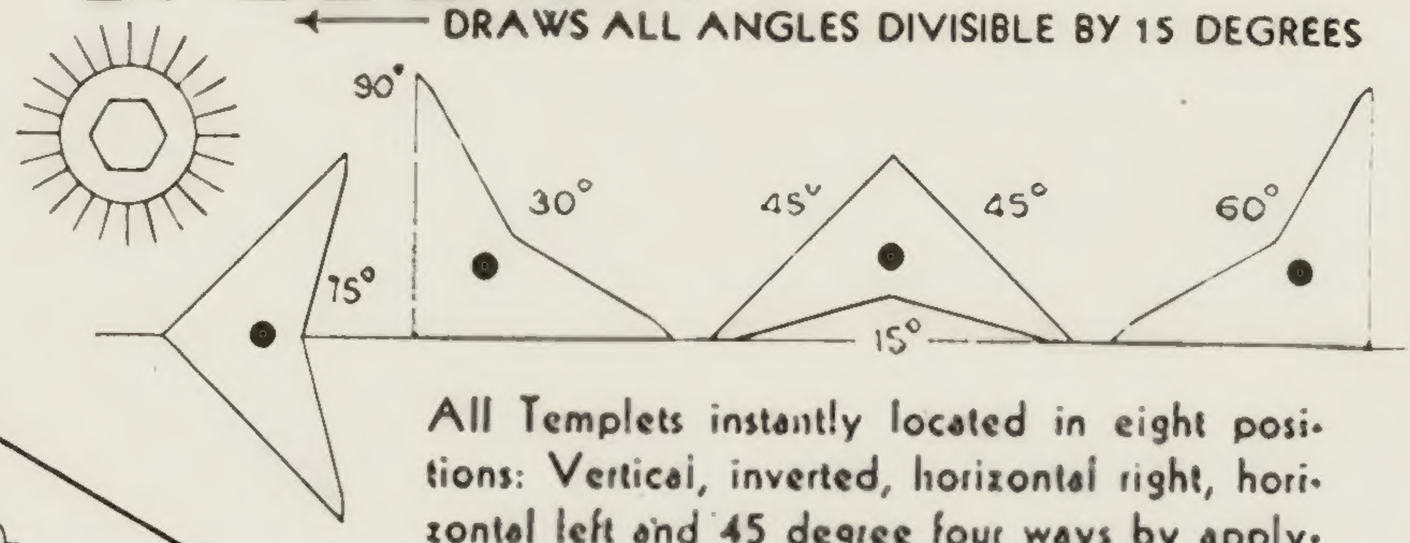
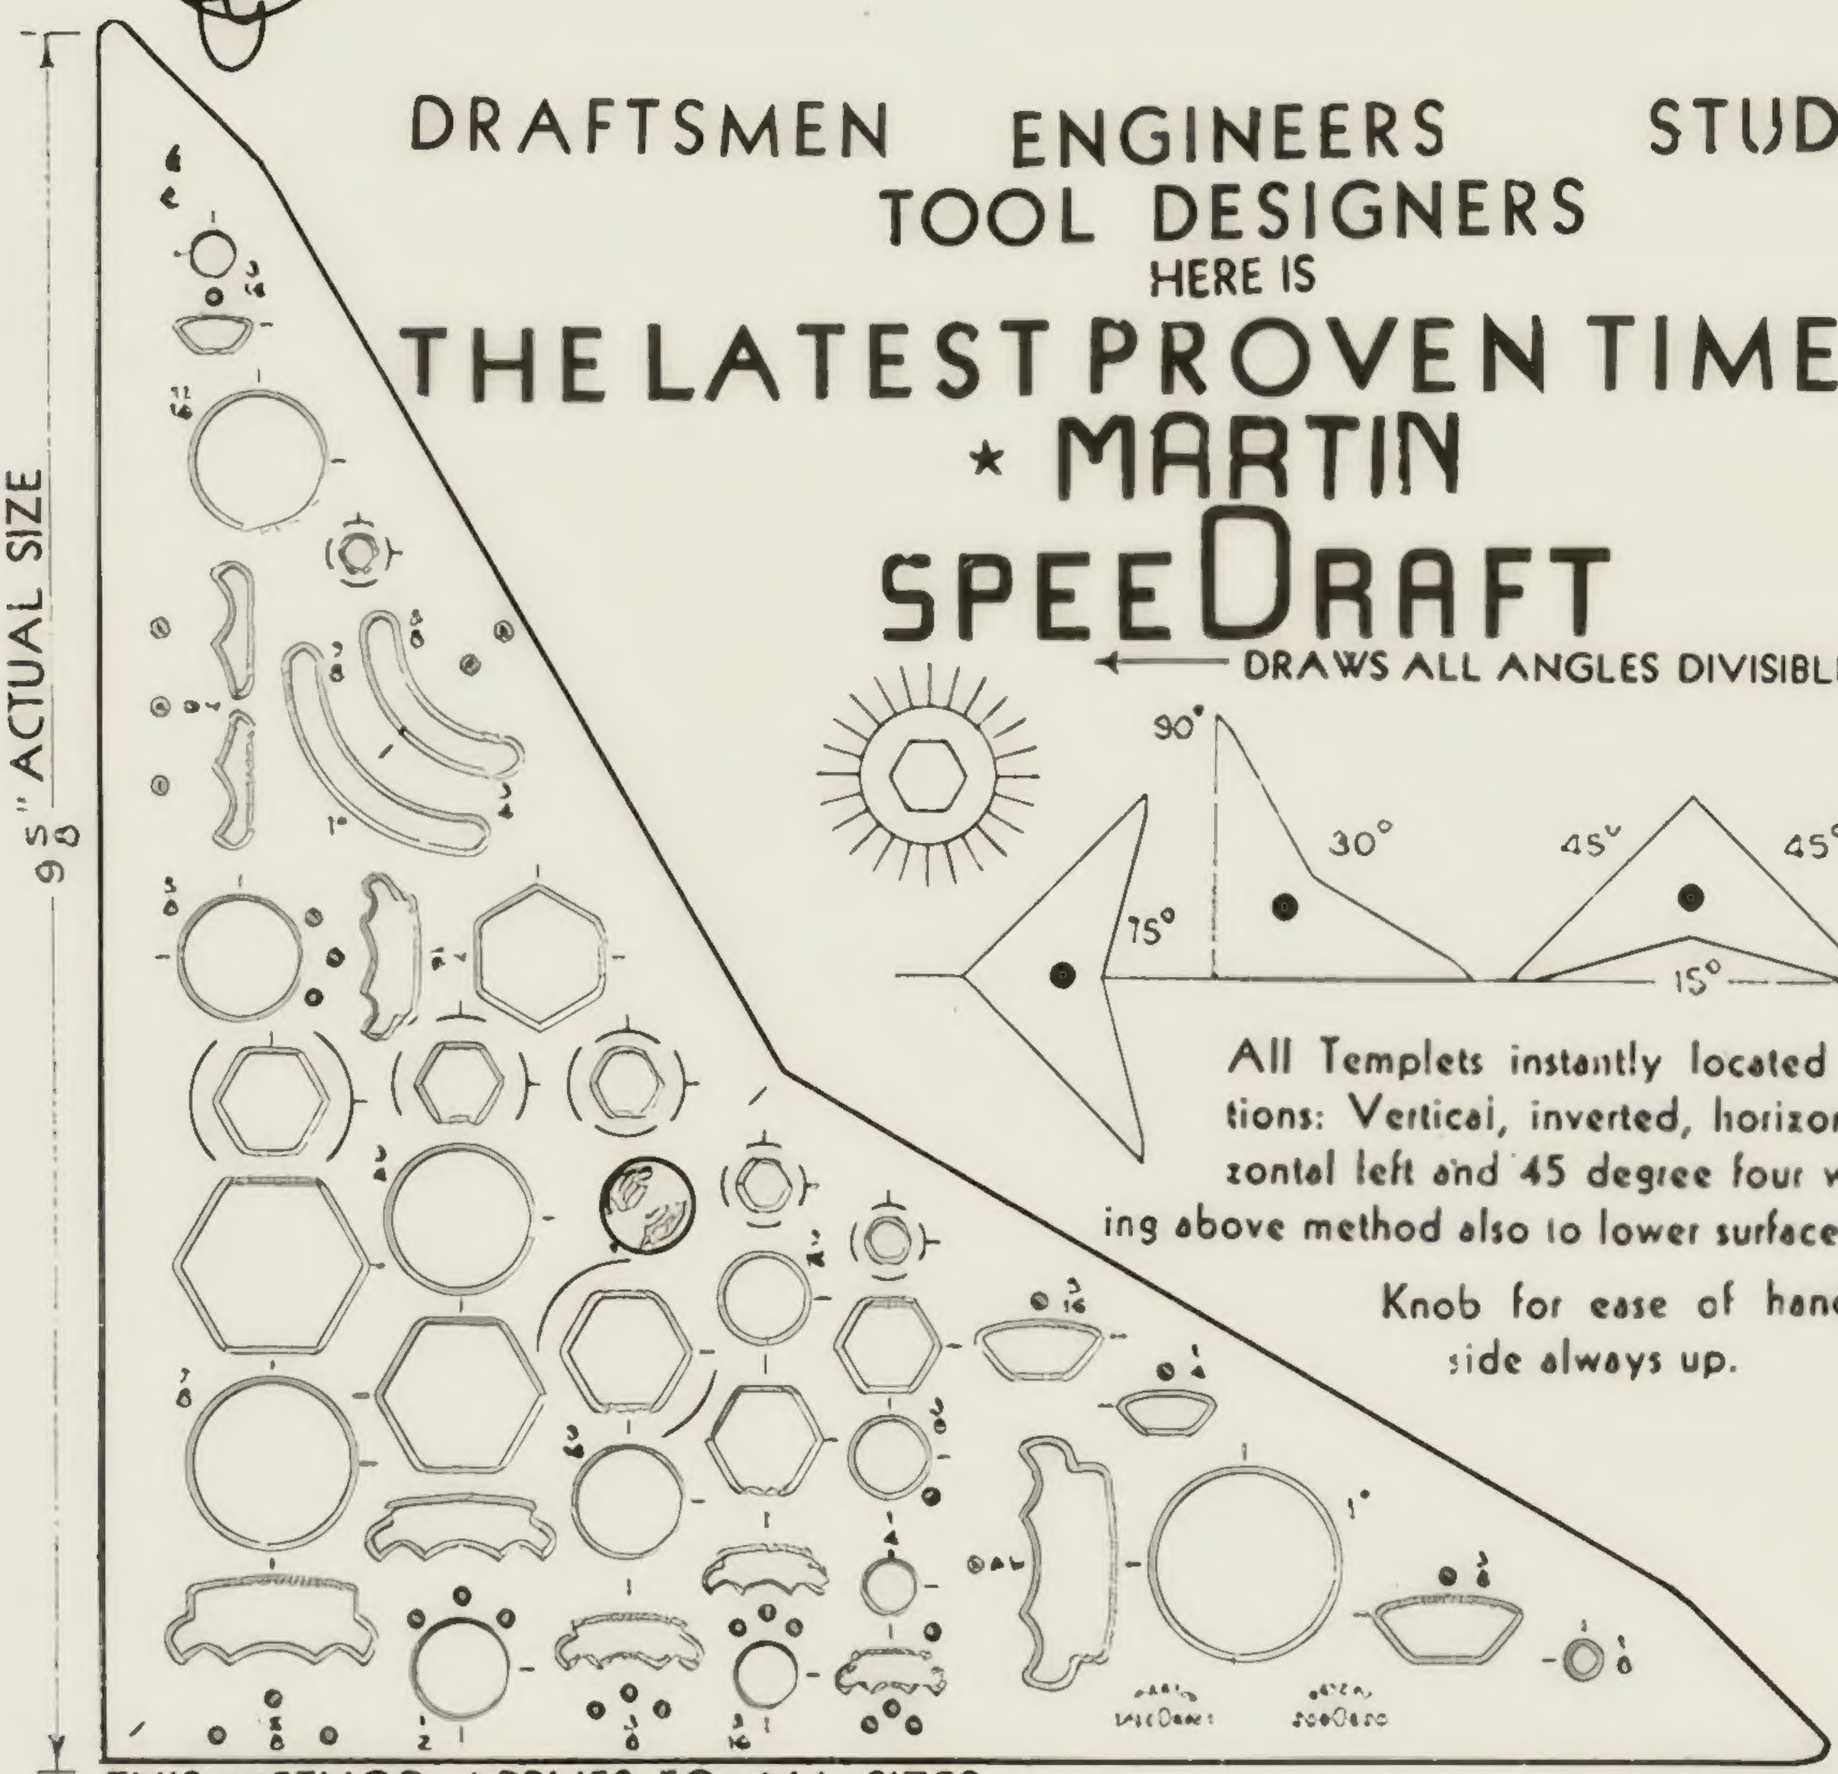
★ MARTIN SPEEDRAFT

← DRAWS ALL ANGLES DIVISIBLE BY 15 DEGREES

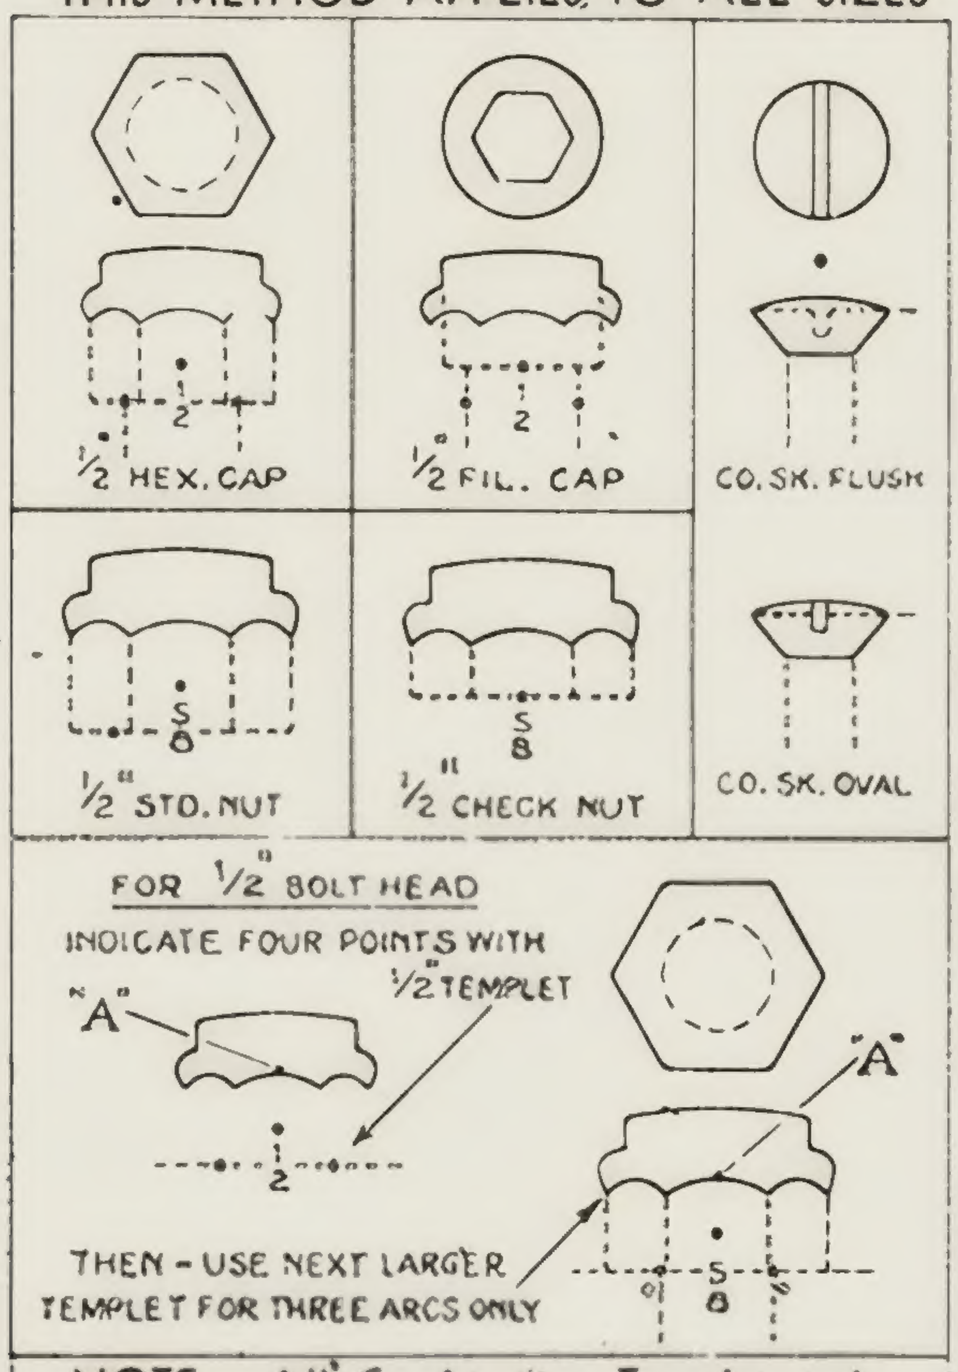




All Templets instantly located in eight positions: Vertical, inverted, horizontal right, horizontal left and 45 degree four ways by applying above method also to lower surface of straightedge.

Knob for ease of handling. Right side always up.

THIS METHOD APPLIES TO ALL SIZES



NOTE — All Combination Templets indicate size of Standard Hexagon Head Cap Screws and Standard Fillister Head Screws comparing to size stamped thereon.

For all Standard Hexagon Nuts and Check Nuts—use next size larger for width and thickness. Also use next size larger for width only of Standard Bolt Heads, as shown above.

CHART SHOWING USE OF TEMPLETS

. . . . . INCREASE YOUR EFFICIENCY

IN DRAWING

The plain view and side elevation of all Hexagon Cap Screws, Hexagon Bolts, Socket Filister Head Screws, Hexagon Nuts and Check Nuts from 3/4" to 3/8" inclusive and the popular sizes of Flat Head Screws and Hollow Headless Set Screws.

Circles from 1/8" to 1" Diameter, and Radii or Fillets from 1/16 to 1" Rad.

All Angles Divisible by 15°

ELIMINATES the use of Scales, Compasses, Protractors, Tables of Measurement, additional Triangles, Templets, Etc.

QUALITY AND PRECISION FOR THOSE WHO DEMAND THE UTMOST IN EFFICIENCY.

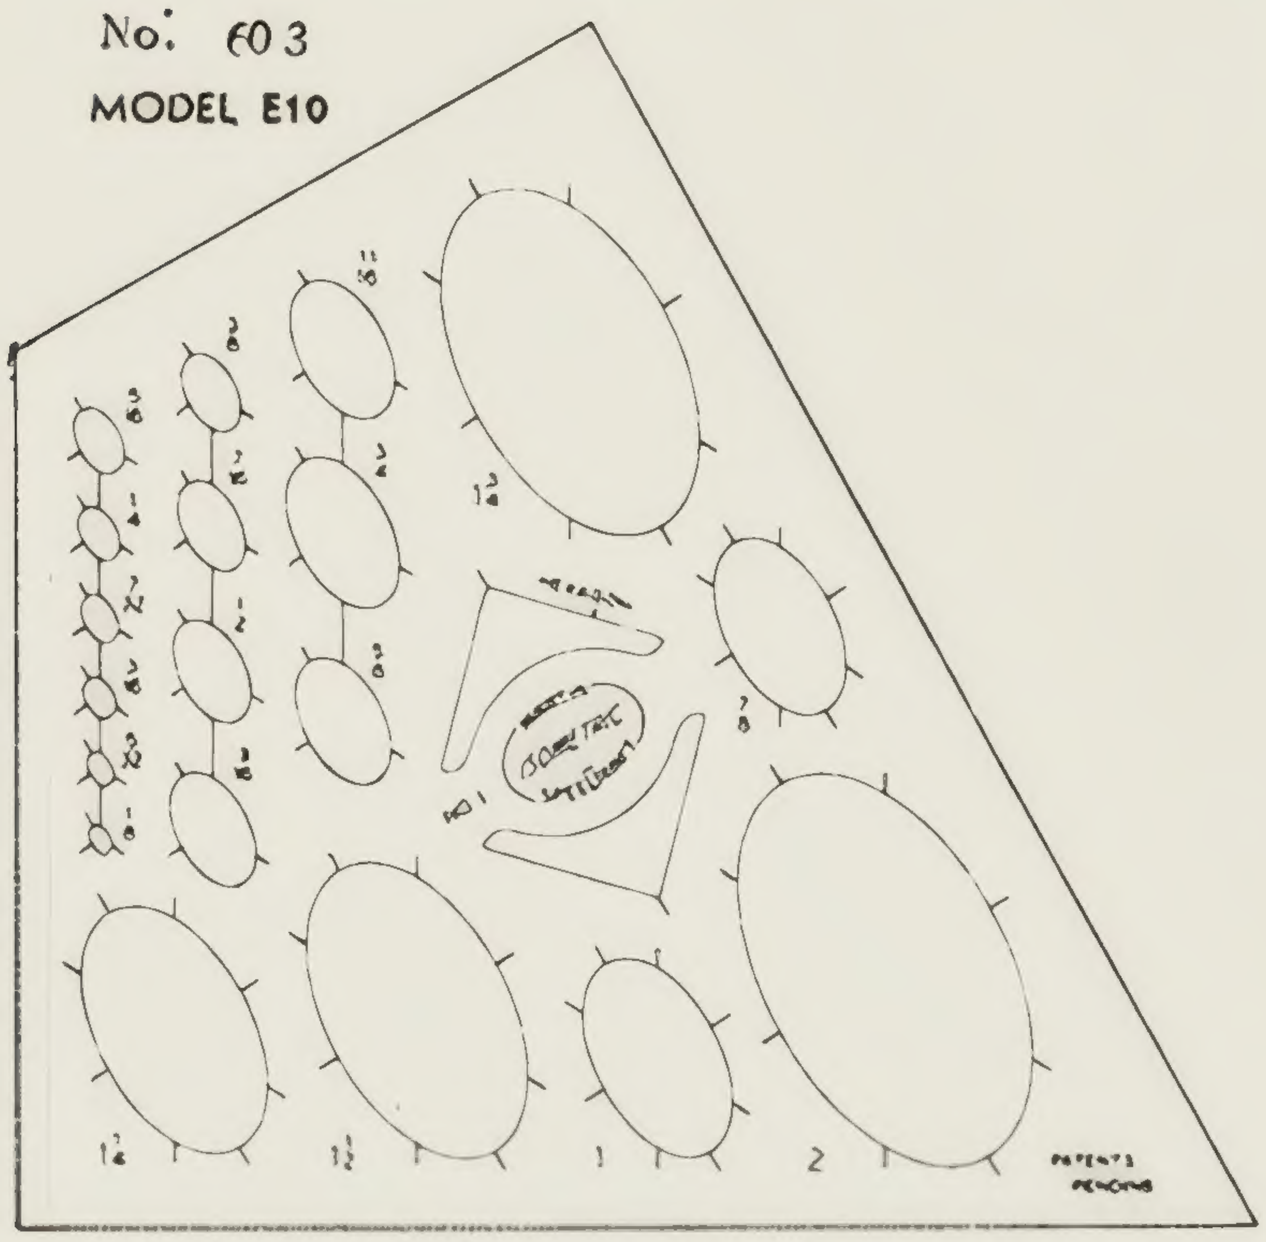
No. 603
MODEL E10



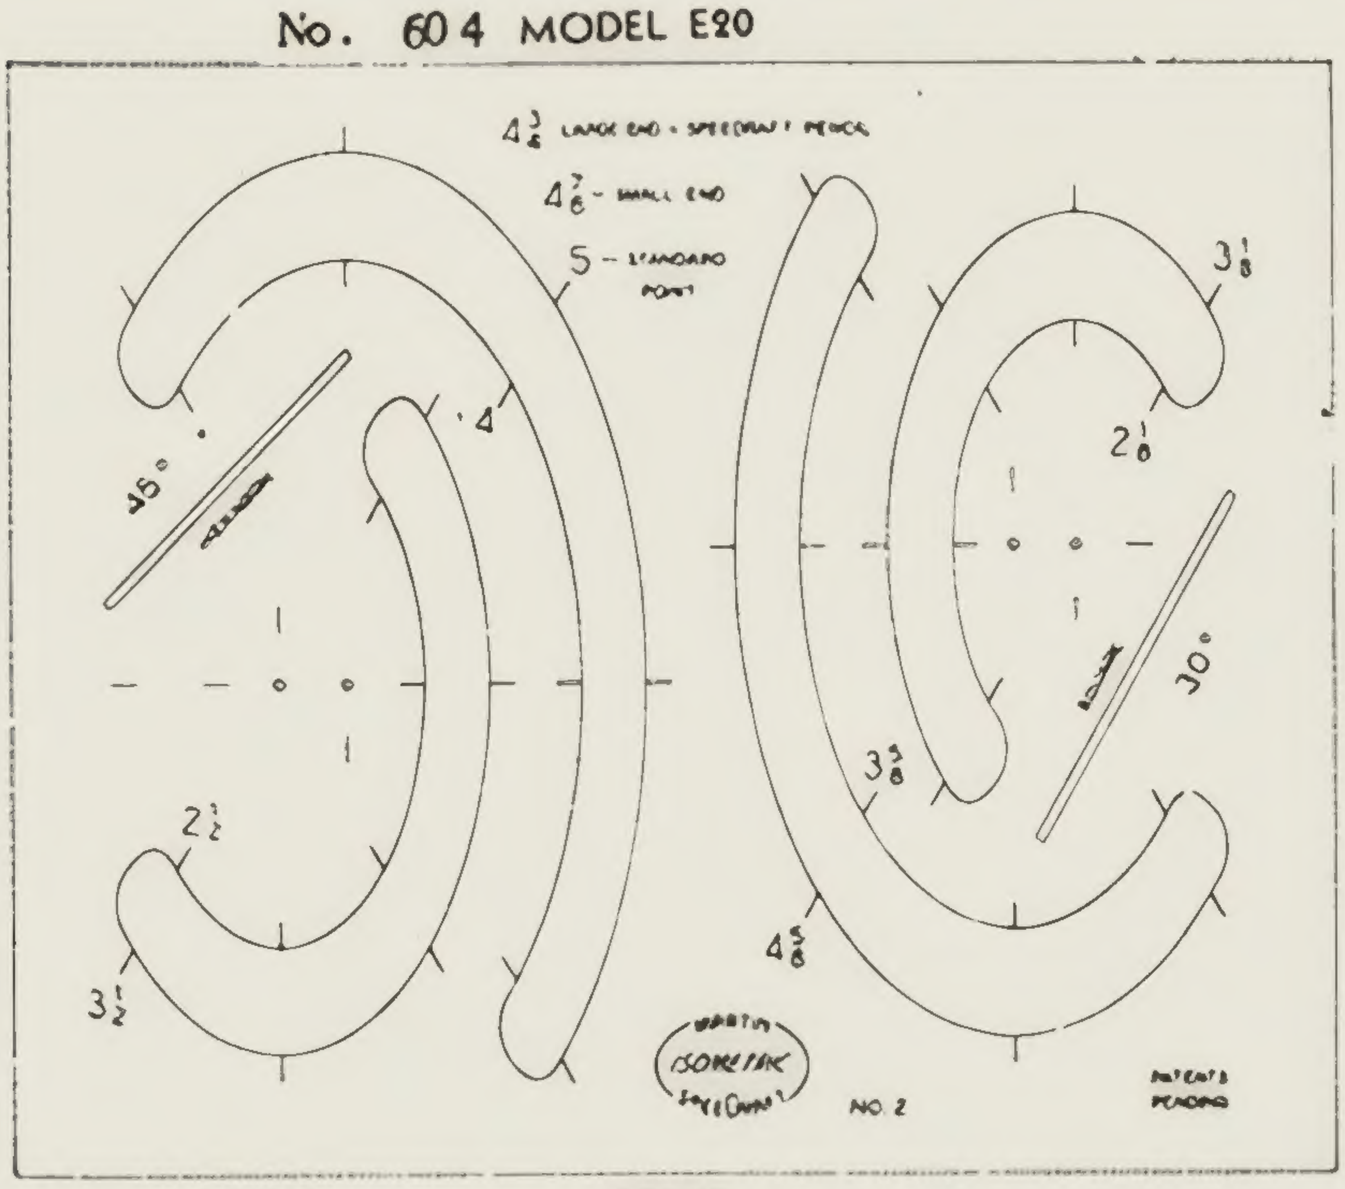
New methods provide an isometric set, time proven by experts to excell in efficiency and utility.

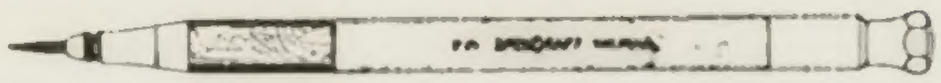
Unique construction permits compactness to efficiently construct —73— accurate ellipses with matching hexagon and square 1/8" to 5" isometric diameter.

Ultrafine finish to mathematical precision, combined with permanent, precise centerlines—produced in full thickness transparent amber triangle stock to insure permanent rigidity.

1/16" INCREMENTS TO 5" DIA. ISOMETRIC

No. 604 MODEL E20



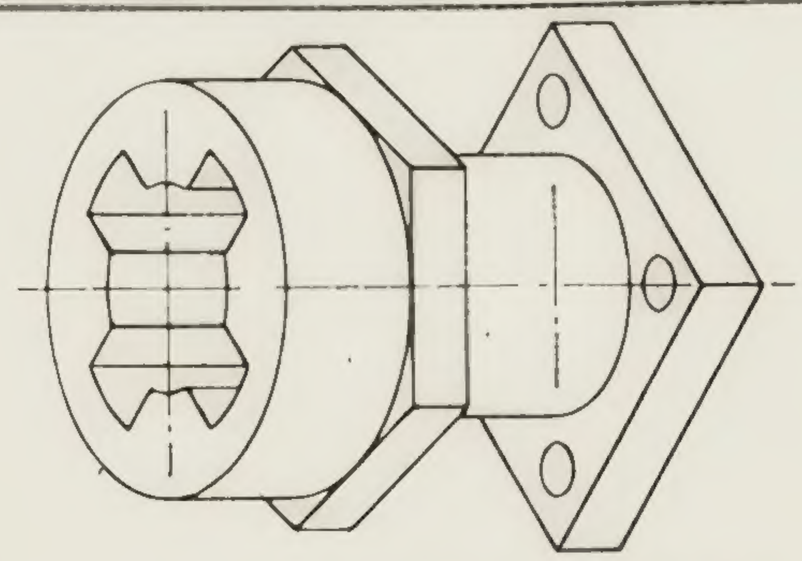


No. 605 SPEEDRAFT PENCIL

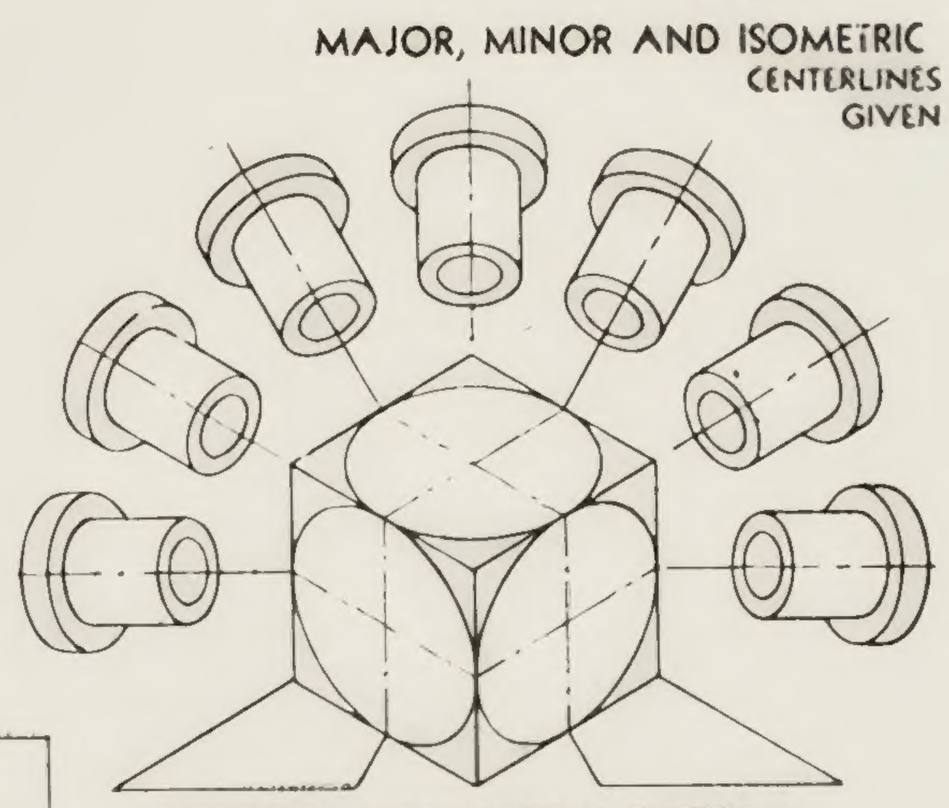
When used with Speedraft Ellipse and Isometric sets alone, it produces 184 definite ellipse sizes in ADDITION to standard pencil capacity.

For use with all templates of standard thickness conforming to general drafting practice to increase or decrease the DIAMETER of object with adapters as follows:

	NO. 1	NO. 2	NO. 3	NO. 4
to increase or decrease DIAMETER	.0625	.125	.1875	.250



MAJOR, MINOR AND ISOMETRIC CENTERLINES GIVEN



PERFECT ISOMETRIC SYSTEM
COMPLETE, COMPACT AND CORRECT

All views, regardless of how complicated, are exploded completely at any angle shown above. DIRECTLY FROM YOUR STRAIGHTEDGE.

35°-16'
True Projection

Half turn of E20 constructs all larger ellipses complete in two strokes of pencil, eliminating many tedius settings and multiplicity of joining points as required by ordinary templates. Outer edges accurately spaced in relation to template holes enabling quick and positive registration from straight edge. Prevents slippage while drawing contour.

REFILL DRAWING PENCILS AND LEADS

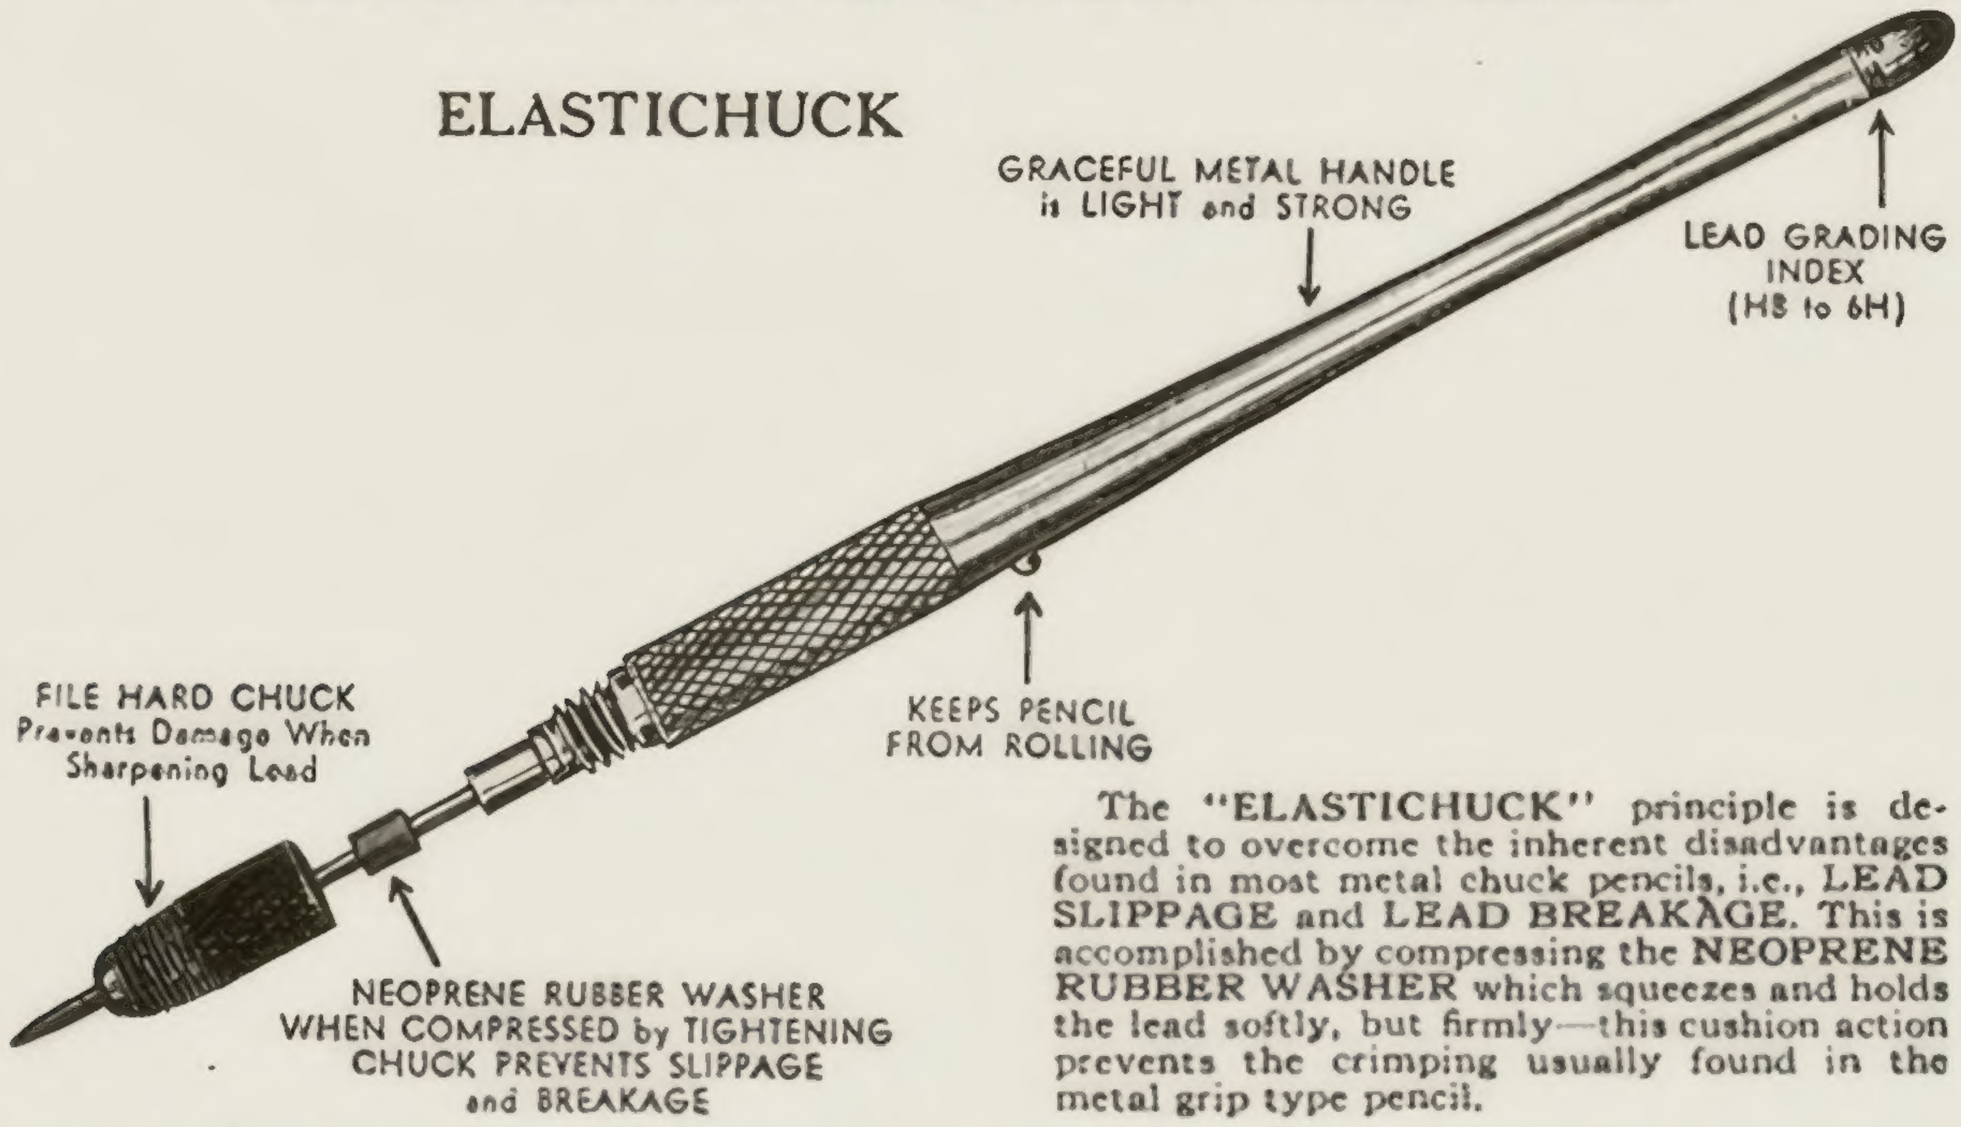
ELASTICHUCK



The "ELASTICHUCK" principle is designed to overcome the inherent disadvantages found in most metal chuck pencils, i.e., LEAD SLIPPAGE and LEAD BREAKAGE. This is accomplished by compressing the NEOPRENE RUBBER WASHER which squeezes and holds the lead softly, but firmly—this cushion action prevents the crimping usually found in the metal grip type pencil.

No. 1965 Gordon ELASTICHUCK Refill Drawing Pencil will hold leads from B to 9H. In Plastic Container with extra Neoprene Washers. $ 1.25

No. 1966 Same as No. 1965 but with DOUBLE END, 1.75
